Ion exchange studies of $^{110m}\text{Ag}(\text{l})$ using synthetic inorganic ion exchanger

by Dubey, N.B.; Bagla, Hemlata (Nuclear and Radiochemistry Lab., K.C. College, Mumbai (India)), E-mail: hemabagla@gmail.com
from Application of radiotracers in chemical, environmental and biological sciences. V. 2

[en] Inorganic ion exchangers play a major role in nuclear technology because of high selectivity and wide range of applications such as separation of radionuclides, nuclear waste management, water desalination, fuel cells and electrolysis. Literature survey reveals that zinc ferrocyanide exchanger has not been used for the adsorption of $\text{Ag}(\text{l})$
